

ADJUSTABLE BOTTLE HOLDER (WORKS WITH LARGER BOTTLES)

INSTRUCTION MANUAL

Looking for a heavy-duty drink holder that keeps up with your hydration needs? This reliable, easy-access bottle holder is compact and adjustable for flexible, stress-free hydration on the go.

This holder is built to accommodate everything from compact 200ml and 600ml bottles all the way up to chunky 800ml and 1-litre favourites (yes, it perfectly fits the insulated 1L Sistema and 1L Tupperware ranges!).

You can take it just about anywhere, too! It easily clips onto your push bike, motorbike, walking frame, manual or power wheelchair, stroller, pram, or travel suitcase. It's also perfect for sports days and outdoor fun, easily attached to your golf cart, beach umbrella, or any other gear for hydration where you want it.

Wherever you're headed, this trusty holder has got your hydration covered!

* Please Note: If you are using a manual wheelchair, please do consider weight distribution. Heavy bottles to one side of your chair can make it more difficult to self-propel, especially when you're not on flat terrain

Great for:

- Attaching to manual or power wheelchairs, push bikes, motorbikes, mobility scooters, walkers, rollators, prams and so much more
- Keeping your hands completely free for safe steering and pushing while keeping hydration close
- Navigating uneven footpaths, ramps, and outdoor paths without worrying about spills
- Holding a wide variety of mugs with handles, travel tumblers, and water bottles
- Anyone wanting an easy-to-reach, rattle-free storage solution that doesn't add awkward bulk to their ride

Features:

- Ergonomic, easy-to-adjust grip for a snug, custom fit around your drink without requiring heavy grip strength
- Tool-free mounting. The heavy-duty clamp attaches seamlessly to round or oval tubing without scratching your device
- Made from impact-resistant materials built to handle daily bumps and accidental knocks
- Lightweight design that holds up to around 1kg securely without adding unnecessary weight to your frame

Image description: A black plastic adjustable bottle holder which holds a large red stainless steel drink bottle for demonstration. Attached to the side of the holder is a rugged, black plastic mounting clamp with an adjustable knob, designed for securing the holder to tubing or frames.

ADJUSTABLE BOTTLE HOLDER (WORKS WITH LARGER BOTTLES)

INSTRUCTION MANUAL

r

Details:

Material: Metal and Plastic

Size: 20cm (L), 7cm to 10.5cm (W) adjustable x 18cm depth (including clamp).

Capacity: Holds 800-1000ml bottles comfortably.

Compatible Bottle Sizes: Various from small to large, can be used with Sistema/Tupperware bottles.

Weight: 220 grams

Package Includes: 1x Adjustable Bottle Holder with clamp

Age Guidance: Suitable for teens and adults; not recommended for young children without supervision due to small mechanical clamping parts

How to Use:

1. For a quick, drill-free setup, open the mounting clamp and place it around your vehicle's roll bar or handlebar
2. Tighten the heavy-duty clamp mechanism until the holder is locked firmly and securely into place
3. Slide your preferred water bottle or cup into the holder
4. Adjust the secure grip firmly around your drink to eliminate any trail rattle
5. Head out into the world knowing your drink is safe, secure, and ready when you are!

Care Instructions:

- Rinse it down or wipe it with a damp cloth if dirty to keep it looking fresh
- Allow to air dry completely if you've been caught in the rain
- Check the grip mechanism occasionally to clear away any trail dust, mud, or debris for the smoothest operation
- Periodically check that the mounting clamp is snug and tight before you head out on rough terrain
