

MULTI-FUNCTIONAL HEATING PAD

INSTRUCTION MANUAL

If you are constantly reheating wheat bags or trying to stop heat packs sliding off your shoulders every five minutes, this makes a lot more sense.

This USB heated shoulder cape is designed to wrap steady warmth around your neck, shoulders, and upper back while still letting you move around normally. The soft cape-style design sits comfortably around your shoulders, so you can keep working, gaming, studying, resting, or relaxing without needing to hold a heat pack in place the whole time.

Powered by USB, it can plug into a wall adapter, laptop, or power bank for warmth at home or while out and about. It can also be laid across your stomach, lap, lower back, or wrapped around limbs when you want warmth somewhere else instead.

With adjustable heat and timer settings, you can choose the level and timing that feels right for you.

Great for:

- Neck and shoulder tension
- Staying warm during colder months
- Desk work and study
- Gaming and screen time
- Writing, drawing, or crafting
- Wheelchair users during cooler weather
- Chronic pain and muscle tension
- Arthritis and joint stiffness
- Comfort and relaxation
- Heat without constantly reheating packs
- Resting at home or while out and about

Features:

- 3 adjustable heat settings
- 3 timer settings
- Soft wrap-style shoulder cape
- USB powered design
- Lightweight and comfortable to wear
- Wearable while moving around
- Covers neck, shoulders, and upper back
- Can also be used on lap, stomach, lower back, or limbs
- Easy button controls

MULTI-FUNCTIONAL HEATING PAD

INSTRUCTION MANUAL
